Sauget City Hall
Sauget, Illinois 62201

Attention: Steven Smith

Dear Mr. Smith:

Your facility is listed as the generator of lime grits on Special Waste Permit #810829 for disposal at East St. Louis/SCA-111am and Roxana/SCA-Barton. A recent Agency policy clarification apparently relieves you of your responsibility to use the Illinois Special Waste Manifest for this waste stream. A copy of this policy statement is attached.

A copy of this letter has been sent to the Disposal Facility permitted to accept your municipal sludge along with a copy of the policy statement. Please contact your disposal firm and confirm their receipt of the policy. After coordinating the change in policy with the disposal site you may discontinue using the Illinois manifest and return unused forms to the Agency.

Eliminating manifests for municipal water or wastewater treatment plant sludges does NOT change manifest requirements for any other special waste stream you may generate. If you have any questions about implementing this policy or any other aspect of waste hauling, please contact Stephen Colantino of the Land Division Compliance Unit at 217/785-2361.

Sincerely,

Michael F. Wachvetal, Manager
Compliance Monitoring Section
Division of Land Pollution Control
